

Tiger Tiger

Juvenile Jungle Fun

Designed By Chris Horne

Product Required:

- 1 x Tiger Anagram SuperShape Balloon (4122101)
- 1 x Anagram Animalz Tiger Print Orbz (4211001)
- 1 x 5" Fashion Orange Sempertex Balloon (20007986)
- 1 x 5" Fashion Black Sempertex Balloon (20001988)
- 1x 12" Fashion Orange Sempertex Balloon (20000773)
- 1 x 12" Fashion Black Sempertex Balloon (20000781)
- 2 x 260 Reflex Lime Green Sempertex Balloons (20014186)
- 1 x Black Foil Balloon Weight (991365-10)
- Faux jungle foliage
- Balloon Bond

Estimated Labour time: 25 minutes

Construction Method:

1. Create a 4-balloon cluster using all of the round latex balloons, inflated to different sizes. Wrap the cluster around the neck of the foil balloon weight.
 2. Inflate the Animalz balloon with air and tie it into the latex cluster by wrapping the neck around and through the centre of the cluster. Adjust the position of the balloons so that the arrangement sits well on the table.
 3. Inflate one of the Reflex Lime Green 260 balloons leaving around 12" uninflated. From the knot end, twist at 4", then make 2 x 4" loops, a 1.5" bubble, 2 x 3" loops, a 1.5" bubble, 2 x 2" loops, a 1" bubble, 2 x 1" loops and a final 1.5" bubble to create the "palm frond". Deflate any remaining balloon and tie off, then tie the frond into the design as shown in the picture.
-
4. Add the Faux foliage into the design as desired, securing with balloon bond.
 5. Create a spiral from the remaining Reflex Lime Green 260 balloon by wrapping the uninflated balloon around a cylindrical object, stretching slightly, and then inflating fully. Release a little air before tying.
 6. Tie one end of the spiral 260 into the centre of the design and twist 2 bubbles into the other end.
 7. Inflate the Tiger SuperShape balloon with helium and attach it to the end of the 260 spiral by wrapping the neck around and through the two bubbles created in step 6.

Pink Fizz

Elegant and Sophisticated Table Centrepiece

Designed By Chris Horne

Product Required:

- 1 x Cheers Rose Anagram Junior Shape (4048401)
- 6 x 5" Sempertex Metallic Rose Gold Balloons (20009123)
- 6 x 5" Sempertex Satin White Balloons (20002011)
- 4 x 5" Sempertex Satin Pink Balloons (20002012)
- 3 x Faux Roses, Dusty Pink
- Rose Gold Satin Ribbon
- Metallic Silver Curling Ribbon (991001)
- 1.5m of 8mm Microbore Copper Tubing
- Balloon Bond and Stretchy Balloon Tape

Estimated Labour time: 15 minutes

Construction Method:

1. Roll the copper tube into a loose spiral and pull up on the centre to form the support as shown in the picture.
2. Create a 4-balloon cluster of 2 x rose gold, 1 x white and 1 x pink 5" balloons inflated to 3.5"
3. Create a 4-balloon cluster of 1 x white, 2 x pink and 1 x rose gold 5" balloons inflated to 2.5". Wrap this cluster into the cluster created in step 2 to form a collar and wrap tightly to the top of the copper spiral.
4. Create a 4-balloon cluster of 1 x pink, 2 x rose gold and 1 x white 5" balloons inflated to 2". Wrap this around the copper spiral, halfway up.
5. Create a 4-balloon cluster of 2 x pink, 1 x rose gold and 1 x white 5" balloons and wrap around the copper spiral, close to the bottom.
6. Cut the stems of the roses to about 1/2" long and cover the cut ends with a small piece of stretchy balloon tape to protect the balloons.
7. Attach one rose to each latex cluster with a little balloon bond.
8. Make 3 x bows with the stain ribbon, and tie around with silver curling ribbon. Tie one bow into each latex cluster.

CINDERELLA CARRIAGE

Created By Chris Horne, Amscan International Limited.

Perfect for themed events, children's parties, and anytime dreams may come true....

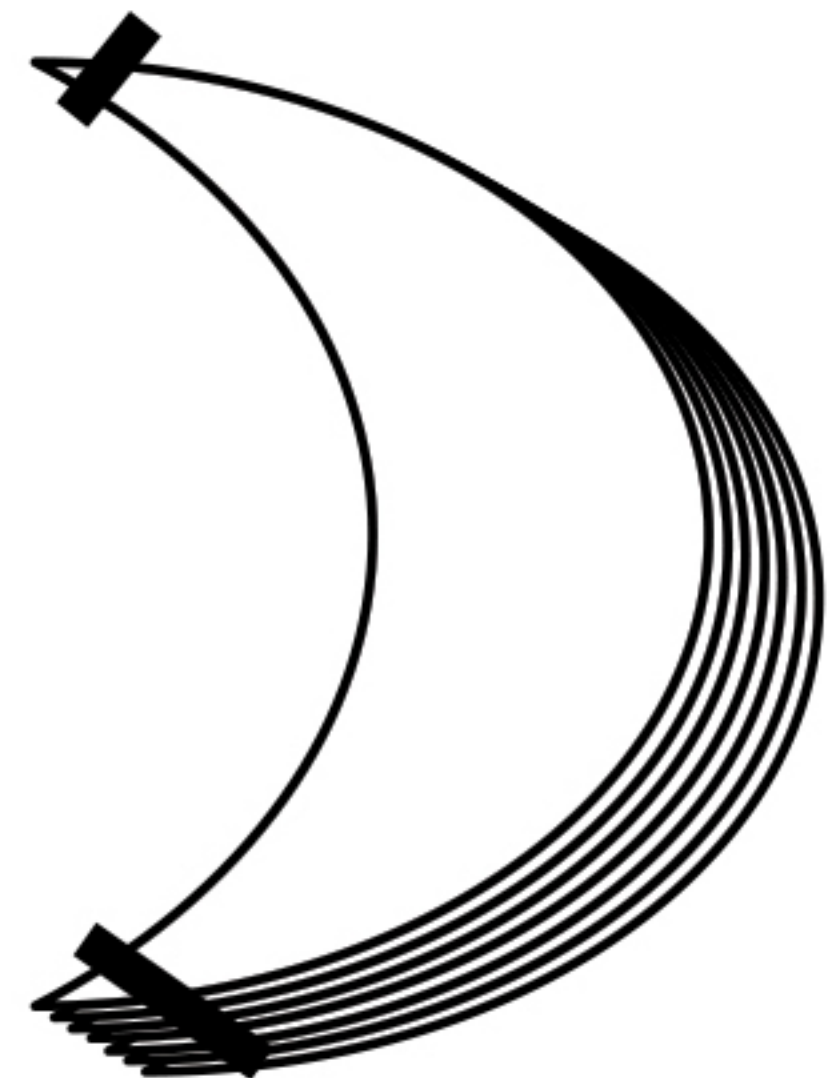

Product Required:

- 8 x 35" Holographic Fireworks Crescents: (1624599)
- 1 x 9" Silver Heart: (1630699)
- 4 x 15" Pastel Blue Curves: (1635399)
- 4 x 28" Pastel Blue Curves: (1635599)

- 4 x Standard Silver Circles: (2057602)
- Cable Ties, Balloon Bond (CC10525) and Stretchy Balloon Tape (CC10630)

Construction Method:

1. Place the uninflated 35" crescents one atop the other in a neat stack so that they all line up perfectly.
2. Use a cable tie to secure all 8 points (one from each balloon) together, at each end of the crescents. Place the cable tie about 1" in from the point, and ensure it is securely tightened. (see diagram, right)
3. Carefully air inflate the 8 balloons. Do not over inflate!
4. Air Inflate and heat seal the 15" curves and the 9" heart. Cable tie them all together at the necks, then attach the cluster to the top of the carriage with a second cable tie. Secure the balloons in place with balloon bond if necessary.
5. Air Inflate one of the 28" curves and one of the circles. Cable tie them together at the necks, tight to the body of the balloons. Tidy the tails with tape if necessary, then secure the circle into the curve of the curve balloon with balloon bond tape. Make 3 more of these.
6. To complete the design, secure the three wheel assemblies created in step 5 above to the bottom of the carriage as shown, using balloon bond and / or stretchy balloon tape.
7. It may be necessary to support the carriage using a box or block of the appropriate height placed underneath, so that the wheels do not carry the full weight. Alternatively, Fill the 35" crescents with helium, and weight the carriage down so that it stands correctly.

Estimated Labour time: 25 minutes.
