

# How to Make Your First Balloon Stack

By Strawberry Moon Designs BMTV 528

## Equipment

- Hand Pump
- Adhesive Strips
- Electric Inflator
- 260 Modelling Balloons
- Balloon Sizer

## Products

- 5" Mirror Silver Kalisan Latex (x14)
- 12" Macaron Blue Kalisan Latex (x8)
- 12" Pastel Dusk Blue Sempertex Latex (x4)
- 34" Unique Matte Power Blue Number Foil (x1)
- 32" Bluey Character Supershapes Foil (x1)
  - 14" Bluey Bingo Character Foil (x1)
- Gemar 160g Silver Frilly Weight (x1)

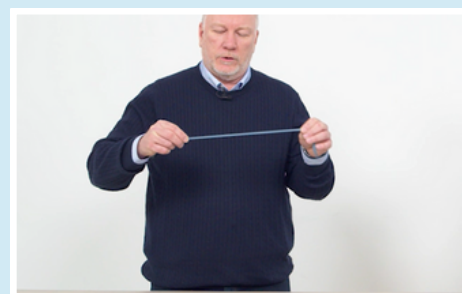

## Process

1. Inflate twelve, 12" latex to 8" and tie these into 3 quads.

2. Inflate eight, 5" latex to 4.5" and tie two more quads.

3. Flatten a 260 into a ribbon and tie off the end.

# How to Make Your First Balloon Stack

By Strawberry Moon Designs BMTV 528

## Process

4. Lie a 4.5" quad on an 8" quad and lash them together using the 260 ribbon you've made.

5. Using the same 260, repeat this process, alternating the sizes of the quads. Your larger quads should be on the outside.

6. Lay your stack horizontally and tie a weight to the bottom using the neck of a balloon.

7. Take a pair of 260s and tie one each to both the neck and a tab of the number foil. Tie these into the base.

8. Line up your larger character foil where you want it to sit, then apply adhesive to its contact points.

9. Make sure the larger character foil is attached to both the number foil and latex for a strong connection.

10. Inflate six, 5" latex to 3" and tie two triplets.

11. Using a neck from your triplets, tie them into the front of the base between each 8" quad.

12. Add your final foil to the other end of the design. Attach this in the same manner as the previous one.
