

# HOW TO... style an OASIS® Ideal Floral Foam Florette

## You will need:

- OASIS® Ideal Floral Foam Florette
- OASIS® Ippon Scissors
- OASIS® Easy Colour Spray
- Bucket with water to soak
- Fresh and dried flowers

### Top Tip

To save on flowers you only need to create height at the front and sides of the foam; the back will typically be hidden within the design.

## Step 1

Set out all of your equipment and flowers and soak the OASIS® Ideal Floral Foam Florette. Our demonstration uses the Medi sized Florette.

## Step 2

Insert your larger dried flowers, starting with the highest and widest points first. Always cut the stems at a sharp angle to ensure they slide into the foam with ease.

## Step 3

Create coverage around the base, keeping close to the OASIS® Ideal Floral Foam Florette. Gypsophila is great for creating uneven heights which adds depth.

### Top Tip

Flowers that reflex, such as Avalanche Roses or Tulips, are perfect for adding texture – to reflex gently peel back the petals and push up from the bottom in order to bend the petals back on themselves.

## Step 4

Add your smaller dried flowers, distributing between the fresh flowers to build up the finished look. Use OASIS® Easy Colour Spray to incorporate metallics or a splash of colour.

## Step 5

Once complete, position your floral design onto the balloon hoop or arch. Secure in place using your preferred method if positioned at a higher point.

### Top Tip

Make sure the arch or hoop is appropriately weighted to ensure it can safely take the additional weight of the floral design.

OASIS® Ideal Floral Foam Netted Garland

OASIS® Floral Hat Box

OASIS® Ideal Floral Foam Florette

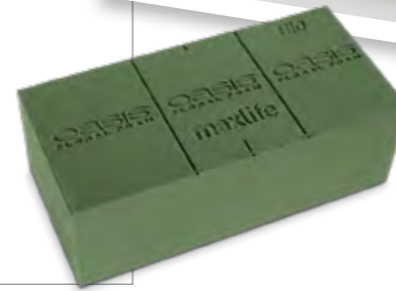

## HOW TO... create a Floral Hat Box

### You will need:

- OASIS® Ideal Floral Foam Maxlife Bricks
- OASIS® Carbon Blade Scissors
- FloraLife® Finishing Touch Spray
- Hamilton hat box
- Frosted film
- Bucket with water to soak
- Fresh flowers and foliage

OASIS® Floral Hat Box

### Step 1

Set out all of your equipment, flowers and foliage.

### Step 2

Soak the OASIS® Ideal Floral Foam, cut down to size when wet if required and place inside your lined hat box. In a Hamilton hat box you can simply place the whole brick in vertically.

### Step 3

Layer your foliage around the edges for coverage. Strip your foliage 2cm at the bottom and place into the foam at an angle so it trails off.

For a textured look, use two different types of foliage and mix together.

### Step 4

Place your large headed flowers amongst the foliage to be the main focus. Strip the stems and cut your flowers at a sharp angle to allow the greatest surface area to soak up the water. Place your smaller flowers closer to the OASIS® Ideal Floral Foam so as to not distract from the main flowers.

### Step 5

Finally, spray with FloraLife® Finishing Touch Spray to lock in freshness in your flowers and attach your celebration balloon to complete the design.

## HOW TO... style an OASIS® Ideal Floral Foam Netted Garland

### You will need:

- OASIS® Ideal Floral Foam Netted Garland
- OASIS® Easy Colour Spray
- OASIS® Ippon Scissors
- Dried flowers

OASIS® Ideal Floral Foam Netted Garland

### Step 1

Set out all of your equipment and dried flowers.

### Step 2

Cut down the garland to use the number of segments required and begin to insert your dried flowers. Add in the larger, heavier stems first to create the desired shape.

### Step 3

Create coverage with your choice of dried or fresh flowers to cover the OASIS® Ideal Floral Foam. We have chosen to use a mix of Pampas Grass, dried flowers and Gypsophila.

### Step 4

Continue to build up the layers until you've created a full floral design. Use OASIS® Easy Colour Spray to incorporate metallics or a splash of colour.

### Top Tip

If using hydrangeas, always submerge heads in water for 10-15 minutes and slice up the stem to reduce wilting.

### Top Tip

Cut down the Pampas Grass rather than use a full stem, to get more lower coverage across the garland.

### Step 5

Attach to your sail board to complete your balloon design.

### Top Tip

Easily attach balloon fillers with our Super High Tack Permanent Glue Dots.
