

## Greetings!

The years go by faster now! 2022 was a tough year, full of big challenges and small victories. Many things are changing but some remain constant... loyal customers, a hard-working Pioneer team, and an enduring faith that tomorrow will be brighter than today. We are grateful that Qualatex ${ }^{\circledR}$ balloons remain the number one choice of balloon professionals around the world. There must be a reason:

- You count on QUALITY, for it gives you and your customers the best value in the long run...brilliant and consistent colours, long-lasting air and helium retention, accurate and legally correct documentation, and a $100 \%$ Satisfaction Guarantee.
- You take pride in EXCELLENCE, for it sets you apart from others.

Pioneer offers artistically designed balloons, trendy marketing materials, inspirational décor ideas, and a respected voice in social media.

- You deserve the best in SERVICE, for it is a reflection of our empathy for you and your need to serve others. Unfortunately, we fell short on this

## On the Cover

Balloons: Globos Dim Pam Mum, @globospimpampum Location: Coria, Extremadura, Spain last year, but we have put plans in place to regain your trust in us to deliver the products you want in a timely manner. We are here to listen to you and hold ourselves accountable to meet your needs.

- You take advantage of EDUCATION, for it increases your skills, hones your senses, expands your outreach, and provides a business structure that ensures lasting success.

In addition, Pioneer has pledged to lead the industry in sustainable polymers and is working with partners on leading-edge technology and methodology to achieve this goal. We are eliminating a few less popular latex colours, thus making way for new Qualatex colour introductions throughout the year. In addition, we have added trendy Microfoil ${ }^{\text {rm }}$ designs and sizes that coordinate with the entire line to make it easier for you to upsell our products. Together with you, we contributed to Give Kids the World through Balloon Wonderland and supported our communities. Together we shared with others the smiles and the joy of balloons. 2022 was a year full of challenges, but we leave it knowing how blessed we are for all we have, for our devoted Pioneer Team, and for you, our loyal customers. 2023 will bring more challenges, but fresh, exciting, and fun times are ahead!

## Many thanks,

Ted A. and Betty Vlamis
And the entire Pioneer Team

## Why Choose Qualatex?

## Great Products:

- Coordinated ranges - helping you create and sell a variety of design styles with ease!
- A superb range of latex balloons known the world over for their consistent colours and high performance standards. Qualatex latex balloons hold up to the demands of even your toughest jobs!
- The exclusive and long-lasting Bubble Balloon ${ }^{\text {TM }}$ range - including amazingly versatile Deco Bubbles, show-stopping Double Bubbles, and a large range of printed Bubbles including popular licensed designs.
- Qualatex Suprafoil ${ }^{T M}$ Balloons, which offer superior float times and will float up to 30 days. Lightweight Suprafoils offer more lift, even in higher altitudes. They also retain helium so well that you will spend less time and money freshening your displays.

## Unrivalled Excellence

- New products, new techniques, the latest fashion trends: our commitment to delivering excellence to our customers is as key to our success now as it was when the company began over 100 years ago.

## Quality You Can Trust

- Qualatex products are covered by our $\mathbf{1 0 0 \%}$ Satisfaction Guarantee, so you can sell our products with confidence. If you find that any of our products falls short of the standard you expect from Qualatex, we want to hear from you! Visit the 'Why Qualatex' tab on qualatexeurope.com and click the 100\% Satisfaction Guaranteed button to send us your feedback.
- Low burst rates that save labour time, helium, and product to ensure customer satisfaction.
- A commitment to total customer satisfaction and continuing improvement of quality products and services.

## Ongoing Service and Support

- Our knowledgeable Sales and Customer Service teams are always on hand to offer help and advice - your success is our goal!
- We offer a host of support materials and retail programmes for our customers - ask your account manager for more details.

## Education that makes a difference

Qualatex offers the most extensive education and events programme in the industry, including a wide range of online options that can be watched time and time again!

## ISO Certification

Pioneer Balloon Company's manufacturing facilities have implemented a formal Quality Management System,

FM 60824 which has been registered by the British Standards Institution Incorporated (BSI, Inc.). This demonstrates that our quality management systems comply with the requirements of ISO 9001/2015.
Facilities in Hamilton (Canada) and Dallas (U.S.) are ISO 9001:2015 registered. Our facility in El Dorado (U.S.) is ISO 9001:2015 and ISO 14001:2015 registered.

## Balloons \& the Environment

Pioneer has pledged to lead the industry in sustainable polymers and is working with partners on leading edge programmes to achieve this goal. Find out all the latest at qualatexeurope.com.

Pioneer ${ }^{\circledR}$ Europe, as a member of the European Balloon and Party Council, does not support balloon releases, as we wish to protect the environment from any unnecessary litter. We urge all of our customers to not endorse or undertake balloon releases, but instead to spread the "Don't Let Go!" message and handle balloons responsibly.

A full suite of customer-focused marketing materials promoting responsible Best Balloon Practices including posters, leaflets, weight labels and care cards is available in 24 languages and can be downloaded from the "Sustainability" tab on qualatexeurope.com. Select printed items are also available to order - see online for more details.

Further useful information can also be found at EBPcouncil.eu and partysafe.eu.

You can also find out more about the Sustainability of Latex Balloons and download marketing information on the "Sustainability" tab.

## Qualatex Latex Balloons

## Balloon Safety

If you are planning to sell unpackaged balloons, you should prominently display the following warnings. If a customer takes home uninflated balloons, you should have copies of the warnings available to give to them. Warnings should be translated into the local language, if applicable.

## Latex:

WARNING! Children under eight years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once. Made of natural rubber latex which may cause allergies. Use a pump to blow up the balloon. Please retain this information for future reference.

## Microfoil $^{\text {TM }}$ \& the Bubble Balloon ${ }^{\text {™ }}$ :

WARNING! Not suitable for children under 36 months due to potential small parts which may pose a choking hazard. Adult supervision required. You are advised to keep this information for future reference.

## Microfoil Balloons:

Foil balloons may conduct electricity. Do not release helium filled foil balloons outdoors or use near overhead power lines. Use only non-metallic ribbon and attach each balloon individually to a weight to keep it from floating away. Inhalation of helium can be harmful. Never breathe in helium.

## Helium First Aid

- Do not inhale helium. Inhalation of helium or balloon gas may result in unconsciousness, asphyxiation and fatality.
- In the event of inhalation: Ventilate the area. Follow the safety information from your helium tank supplier. Call for professional help.

Increase your sales and add value to your gifts when you offer "gifts in a balloon" with the Super Stuffer machine and Qualatex ${ }^{\oplus}$ balloons and accessories. Remember to display stuffing balloon examples in your shop and windows; their intrigue and novelty will create a high perceived value and encourage impulse purchases.

- The Super Stuffer ${ }^{\circledR}$ is a unique self-contained, floor standing balloon stuffing machine.
- Built in casters for ease of mobility.
- With a loading height of 37 " the Super Stuffer is userfriendly eliminating the need for a table or counter work top. The balloon remains in the chamber until it is finished with ribbon and bow.
- The clear dome allows the operator to complete their stuffing creation with 360 degrees of visibility.
- A 5 " diameter chamber collar is injection moulded from tough $A B S$ plastic and designed with 6 nubs. These nubs allow the balloon to be reopened if required.
- Also supplied is a cloth protective sleeve to help protect the balloon from damage during stuffing.
- Balloon Expander included.

## Puff 'N Stuff ${ }^{\ominus}$

Limited on space or need to create designs on the go? The new Puff 'N Stuff is the perfect choice! This table top balloon stuffing chamber is lightweight, portable and compact yet is identical in size to the Super Stuffer ${ }^{\circledR}$ stuffing chamber. Simply connect the hose supplied to your existing balloon inflator (not supplied) and away you go!

- Made of tough clear PETG and ABS plastic, the chamber allows the operator to complete their stuffing creation with 360 degrees of visibility.
- The collar is designed with 6 nubs to allow manual stretching of the balloon neck or to facilitate reopening of the balloon if required.
- A cloth protective sleeve is supplied and used to help protect the balloon from damage during stuffing.
- Also supplied is an inflator hose that can be used with most balloon inflators.

Stuffing balloons, Balloon Expander and inflator sold separately.

## Cylinder Information

Balloongas (generally non-pure helium) is a safe, non-flammable, non-poisonous gas that's lighter than air. It can be used safely either indoors or outdoors. NEVERINHALE balloongas-although not poisonous, it may cause asphyxiation in higher concentrations.

## Sourcing Helium

If you are looking to use or sell helium-filled balloons, you will need to work with a gas supplier to arrange for a regular helium supply. Helium prices will vary dependent upon the size and type of cylinder selected, as well as local delivery and rental pricing arrangements.
The cylinder type you choose may also determine the type of inflation equipment you need - please discuss this with your helium supplier or Qualatex ${ }^{\circledR}$ representative.

Cylinders of balloon gas come in different sizes, so the number of balloons you can fill depends on the size of the cylinder chosen. Use the information on this and the following pages to determine the size of cylinder that might best suit your needs.

Approximate number of Qualatex balloons that can be filled by each cylinder.

Charts show the average number of balloons that can be expected from each size cylinder when the balloons are correctly inflated to the sizes shown.

## Latex \& Cloudbuster ${ }^{\text {Tw }}$ Balloon Helium Chart

All 11" Pearl and Metallic balloons are produced on super-sized forms; while the uninflated balloons look larger than other balloons of the same size, they are designed to inflate to the same size as Standard, Jewel, and Fashion Colours. NOTE: The listed average inflation sizes, flying times, and numbers of balloons per helium tank are conservative averages.
Actual flying times vary depending on temperature and atmospheric conditions.

All Qualatex latex balloons are helium-weight quality and are manufactured in the USA or Canada from biodegradable, pure, natural latex.

* The use of ULTRA HI-FLOAT balloon flight extender is recommended for all helium-filled latex balloons. ULTRA HI-FLOAT can increase the flying
times of latex balloons up to 25 times longer than untreated balloons. For more information about ULTRA HI-FLOAT, visit www.hi-float.com.
** Because the filling and usage of display balloons is beyond our control, no performance or longevity guarantee can be made. Inflating Cloudbusters with 60/40 helium and air will reduce the amount of helium needed. See pages 180-181 for Conwin 60/40 regulator.

## Hi-Float Accessories

## Treat your latex balloons and your bottom line!

With ULTRA HI-FLOAT ${ }^{\text {TM }}$ balloon flight extender, you can increase the float time of helium-filled Qualatex latex balloons by up to 25 times! That means added value and increased satisfaction for your customers that will differentiate you from your competitors and result in repeat business!

ULTRA HI-FLOAT is an aqueous solution containing a special water-soluble plastic. It dries inside the latex balloon to form a barrier coating that helps hold in helium.

ULTRA HI-FLOAT is a trademark of the HI-FLOAT Co., in Louisville, KY, USA. *Estimates for typical indoor conditions. Flying time will be less outdoors and varies greatly depending on humidity, temperature, altitude, etc. Balloons typically float half as long in summer as in winter.

## Microfoil Balloon Helium Chart

NOTE: The listed average inflation sizes and numbers of balloons per helium tank are conservative averages.
A properly inflated, helium-filled Microfoil balloon will float for at least 3-5 days and can be easily refreshed.

## Bubble Balloon ${ }^{\text {Tw }}$ / INFLATION INSTRUCTIONS

## Important:

Inflate immediately after opening package.

## Single Bubble

To use a latex regulator, keep inflating until the Bubble Balloon is very round and the wrinkles and bumps along the seam are gone. Bubble Balloons stretch like latex balloons and look like beach balls when properly inflated (see illustration below).
The Bubble Inflator ${ }^{\text {TM }}$ automatically inflates Single Bubbles and Deco Bubbles to the perfect pressure and size with "Wrinkle-Free Seams".
See page 174 for more details

## Double Bubble (4 Easy Steps)

1. Locate the blue valve (A). Slightly inflate the outer Bubble Balloon with a latex regulator so the inner shape has room to inflate.
2. Locate the white valve (B). Fully inflate the inner shape with a foil regulator.
3. Use both hands to manipulate the inner shape so it's in a good position.
4. Return to the blue valve (A) and fully inflate the outer Bubble Balloon with a latex regulator. Keep inflating until the Bubble Balloon is very round and the wrinkles and bumps are gone (see illustration).
Tip: If the inner shape shrinks noticeably while inflating the outer Bubble Balloon, return to the white valve (B). Use your latex regulator to add a micro-second of helium, or use a hand pump to add just enough air to fill out the inner shape.

## Qualatex

All our Bubble Balloons can be air-filled for even longerlasting fun, either using a hand pump or electric air inflator.
Share your air-filled Bubble creations with us on Instagram using the hashtags \#qualatexeurope \#airfilledbubbles and we will share the best ones!

## Tips

- Once the package is opened, the Bubble Balloon must be inflated immediately or it will dry out. Discard the moisture pack after inflation.
- Do NOT use a foil (auto shut-off) regulator to inflate Single Bubbles, the outer bubbles of Double Bubbles, or Deco Bubbles; if you do, the foil regulator will shut off too soon. Instead use latex regulators or Bubble inflators on the Bubble Balloon, and keep inflating until the wrinkles and bumps are gone.

## Deco Bubble

- Inflate with a latex balloon regulator immediately upon opening. When air inflating, use nitrogen or compressed air. Do not use an automatic shut-off regulator or regular air inflator; they do not have enough power to inflate a Bubble Balloon wrinkle-free. Hand pumps or other electric air inflators can be used.
- When inflating Deco Bubbles, NEVER leave ANY wrinkles on the seam. Although the balloon will seem tight, continue inflating and stop just as the wrinkles disappear, leaving a perfectly smooth seam.

## Tying Deco Bubbles

1. Tightly grip the neck and twist several times.
2. Wrap a ribbon, 160 Q , or 260 Q around the neck, wrap around several times, and tie a permanent knot. Tying the knot extremely tight will ensure a long-lasting Deco Bubble.

## Helium Guidelines

Over-inflating or under-inflating the Bubble Balloon can affect its float time and lift ability. Follow package instructions to inflate properly and achieve the best float times. Actual flying times will also depend on temperature and atmospheric conditions. Deco Bubble float times and lift ability will vary if other types of balloons are placed inside.

NOTE: The listed average inflation sizes and numbers of balloons per helium tank are conservative averages. A properly inflated, helium filled Bubble balloon will float 1-3 weeks. Actual flying times vary depending on temperature and atmospheric conditions (and tying techniques for Deco bubbles).
