## Safety Warnings for Unpackaged Balloons

If you are planning to sell unpackaged balloons, you should prominently display the following warnings. If a customer takes home uninflated balloons, you should have copies of the warnings available to give to them. Warnings should be translated into local language, if applicable.

### Latex:

**WARNING!** Children under eight years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once. Made of natural rubber latex which may cause allergies. Use a pump to blow up the balloon. Please retain this information for future reference.

### Microfoil™ & the Bubble Balloon™:

**WARNING!** Not suitable for children under 36 months due to potential small parts which may pose a choking hazard. Adult supervision required. You are advised to keep this information for future reference.

### Microfoil Balloons:

Foil balloons may conduct electricity. Do not release helium-filled foil balloons outdoors or use near overhead power lines. Use only non-metallic ribbon and attach each balloon individually to a weight to keep it from floating away. Inhalation of helium can be harmful. Never breathe in helium.

### Helium First Aid

- Inhalation of helium or balloon gas may result in unconsciousness and can cause death.
- First Aid measures in the event of inhalation: Victim may not be aware of asphyxiation. Keep patient warm and rested. Call for professional help. Apply artificial respiration if breathing has stopped.

Qualatex® and Northstar balloons conform to the current EU Toy Safety Directive EN71. Conformance certificates are available on request.
