

# Halloween Twisting Treats

By Dream Higher Events BMTV 558

## Equipment

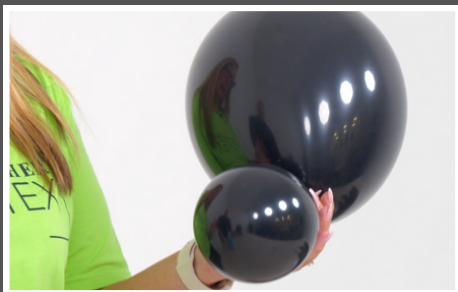

- Hand Pump
- Electric Inflator
- 260 Modelling Balloons
- Vinyl Cutting Machine

**balloon market**  
the marketplace for the balloon & party trade

## Products

- Tuftex 11" Black Latex
- Tuftex 5" Black Latex
- Tuftex 260 Black Entertainer Balloons

## Process - Spider

1. Inflate a 5" and an 11" latex and tie these into a duplet to form the body of the spider.

2. For your legs inflate four black 260s to varying sizes.

3. Take your shortest 260 and make a pinch twist approximately 4 inches from the neck.

## Process - Spider

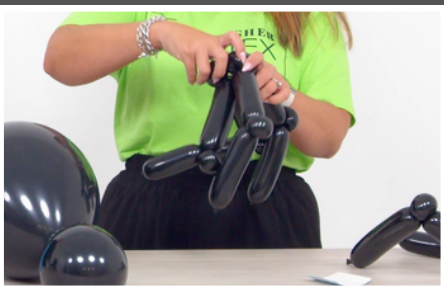

4. Make another pinch twist approximately 5 inches from the first and then another the same distance from the second.

5. Measure the rest of the balloon against the neck and the first pinch twist. Twist the balloon here, cut the excess and tie off to finish the first set of legs.

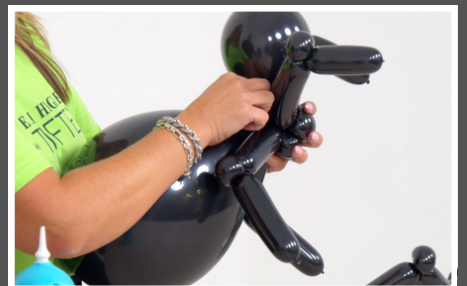

6. Repeat steps 3 to 6 three more times with the rest of your 260s. Slightly increase the distance between each pinch twist of the legs as they get longer.

7. Take your two smallest sets of legs and twist together using the centre pinch twist of both.

8. Turn the pinch twists so they're on the bottom and turn the legs to point downwards.

9. Place your duplet on top of the legs and twist the 5" balloon around one of the pinch twists.

10. Repeat steps 8 and 9 with the remaining legs.

11. Tie this set to the duplet on the opposite side to the first set of legs using a scrap of 260.

12. Make a pair of eyes using vinyl and a cutting machine and stick this to the head of the spider.

## Products

- Tuftex 260 Golden Effects Entertainer Balloons
- Tuftex 260 Black Entertainer Balloons

## Process - Pumpkin

1. For the broom head, inflate your 260 and tie the neck of the balloon to the tip so it forms a loop.

2. Push the knot to the adjacent side of the adjacent side of the 260 so it forms a 'bow' and twist at this point.

3. Take the first smaller loop and make a twist at the top. Repeat this twist in the other loop.

By Dream Higher Events BMTV 558

## Process - Broom

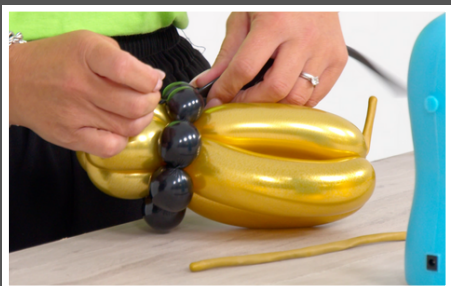

4. Feed one loop through the other so the twists sit together.

5. Secure by pushing one side through the gap of the other sides.

6. Hold the 4 sides together tightly and make a twist a third from one of the ends.

7. For decoration, slightly inflate a black 260 and make a string of pearls. Tie this around the final twist you made in the broom head.

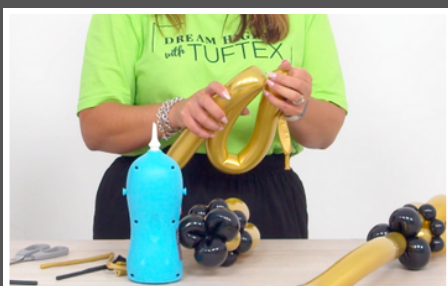

8. Take another black 260 and tie three small loop twists one after the other.

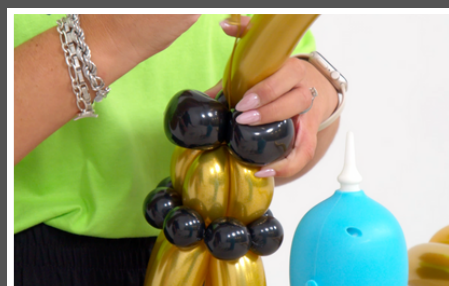

9. Cut away the remaining 260 and use the excess latex to tie to the top of the broom head.

10. For the stick of the broom, fully inflate a gold 260.

11. Bend and twist the 260 as you slowly release some air to give it a crooked look.

12. Using the neck of the 260, tie this into the loop twists you made prior.

## Process - Small Pumpkin

1. Inflate a black 260 and make a small pinch twist.

2. Make another pinch twist approximately 6 inches from the first. These twists will be the top and the bottom of your pumpkin.

3. Fold the remaining 260 back towards the first pinch twist.

# Halloween Twisting Treats

By Dream Higher Events BMTV 558

## Process - Small Pumpkin

4. Twist the latex into the first pinch twist where the two parts meet.

5. Bend the 260 back down and repeat step 4 at this pinch twist.

6. Repeat steps 3 and 4. Cut the excess latex and tie off.

7. Slightly inflate a Rockstar Effect 260 and tie the neck around one of the pinch twists.

8. Repeat steps 4 to 6, Making the segments alternate with the first 260.

9. Adjust each 260 bubble to obtain the shape you'd like. Cut off any excess latex.

10. Spread open two of the bubbles of the pumpkin to reveal the inside and push the black pinch twists down inside the pumpkin.

11. For the stalk, slightly inflate a 260, tie off just after the bubble and cut the excess latex.

12. Tie the stalk to the top of your pumpkin.

- Tuftex 11" Lime Green Latex

## Process - Big Pumpkin

1. Inflate your black 260 and tie the neck of the balloon to the tip so it forms a loop.

2. Push the knot to the adjacent side of the 260 so it forms a loop and twist at this point.

3. Take the first smaller loop and make a twist at the end of this. Repeat this twist in the other loop.

## Process - Big Pumpkin

4. Feed one loop through the other so the twists sit together.

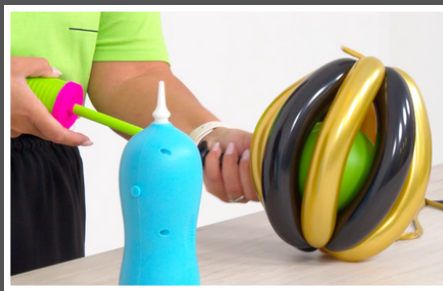

5. Secure by pushing one side through the gap of the other sides.

6. Repeat steps 1 to 5 with your golden 260.

7. Take one of the 260s and squeeze it inside of the other. Adjust the bubbles so the colours alternate.

8. Take a Lime Green 11" and inflate this inside the pumpkin until it is your desired size.

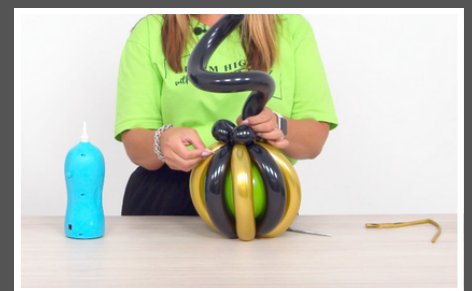

9. Inflate another black 260 and make three small loop twists. Tie off and cut off excess latex.

10. Tie this to the top of the pumpkin.

11. Inflate and spiral a black 260.

12. Tie the spiral to the loop twists you just attached.
