## Process

1. Take your black link-o-loons and tie enough together to wrap around half of your hoop. This is your first line. Alberto uses around two dozen balloons.

2. Take your gold link-o-loons and make three lines, each with the same number of balloons as the black line.

3. Tie the end of your first gold line between the first two link-o-loons in the black line.

## Process

4. Tie the next gold line to the second link.

5. Tie your last gold line to the third link.

6. Take the first three black link-o-loons and wrap them around the pole, tying the end of the black line to the third link in the same line.

7. Take your black line and twist it between the first two link-o-loons in one of the gold chains.

8. Continue this pattern, working down the golden chains with your black one. You may have to add or remove link-o-loons to the chains as you go.

9. Now twist the next link-o-loon in your black chain to an adjacent gold chain. Then, do the same with the final gold chain so that they are all even.

10. Repeat steps 1 to 9 for the other half of the hoop.
