- Sempertex 260 Reflex Line Green
- Sempertex 260 Reflex Violet

Equipment

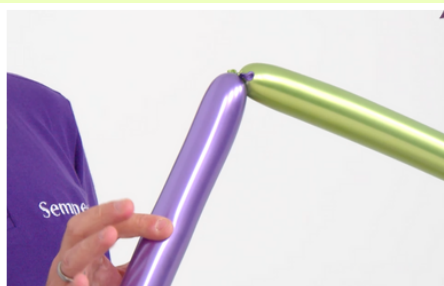

- Hand Pump
- Electric Inflator

Process

Click the image to see it in action!

1. Inflate two reflex Lime Green and two Violet 260s around halfway.

2. Tie each green 260 to each purple 260 so you have two 'duplets'.

3. With both your green 260s, twist a small bubble at the neck of each balloon.

Diamond Weave Twisting Technique

By Rob Driscoll

BMTV 551

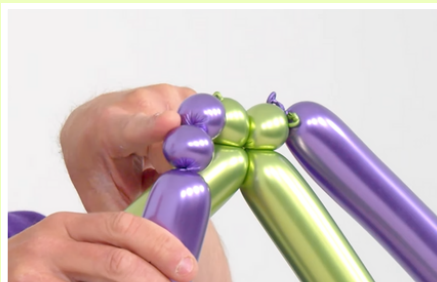

Process

Click the image to see it in action!

4. Twist these two bubbles together.

5. Twist two bubbles of the same size in your first purple balloon.

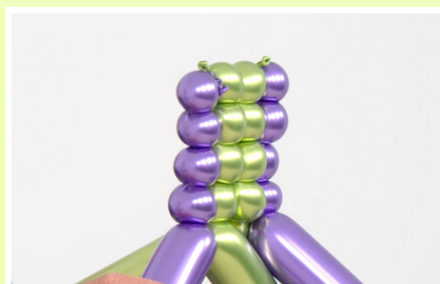

6. Twist another single bubble in the green 260 that's adjacent to the purple bubbles you just twisted.

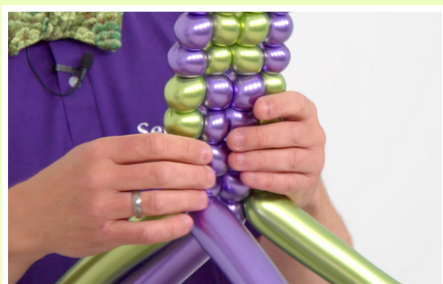

7. Twist the green and purple 260s together below the bubbles. This will make a square or 'diamond' of bubbles.

8. Repeat steps 5 to 7 on the other side, with the other green and purple 260.

9. Repeat steps 3 to 8 again to make four rows of bubbles

10. To invert the design, swap the positions of your balloons and follow steps 3 to 9.

11. Repeat steps 3 to 10 until the weave is at your desired length. Cut away any excess from the 260s and knot the ends.

12. To complete your tube, simply tie the end of your weave together using the knots you've just made.
