Process

1. Take your Round Floral Pot and glue your four balloon sticks evenly around the interior of the pot using your hot glue gun.

2. Make four bows with your Light Pink Biodegradable ribbon.

3. To start your twisted flower, make a loop twist in the 260.

Prima Sphere Hot Air Balloon

By Tope Abulude

BMTV 559

Process

Click the image to see it in action!

4. Follow this with five more loop twists, one after the other. Cut and loop the excess latex into the flower.

5. Inflate your Happy Birthday sphere balloon and tie the flower to the neck of the sphere.

6. Place the sphere on top of the balloon sticks with the flower at the bottom. Gently push down until you're happy with the sphere placement.

7. Attach the balloon sticks to the sphere using cello tape.

8. Cover the cello tape you've used by sticking the pink bows to the top of each stick.

9. Stick your hot air balloon on top of your cake board using your hot glue gun.

10. Make five quads using 5" White Latex inflated with one pump.

11. Stick these quads around your cake board.

12. Place your bear in the flower pot to finish.
